

Amendments to the specification:

On page 1, line 2, please amend the heading as follows:

~~Prior Art~~ Background of the Invention

On page 1, please amend the paragraph contained in lines 3-4 as follows:

B1 The invention is ~~based on~~ relates generally to a windshield wiper having a
wiper arm, which is driven via a drive shaft and to which a wiper blade is
pivotably connected ~~as generically defined by the preamble to claim 1.~~

On page 4, line 14, please amend the heading as follows:

~~Advantages~~ Summary of the Invention

On page 9, line 18, please amend the heading as follows:

Brief Description of the Drawings

On page 11, line 1, please amend the heading as follows:

Detailed Description of the Preferred Exemplary Embodiments

On page 20, please amend the abstract of the disclosure as follows:

Abstract of the Disclosure

B2 The invention is ~~based on a~~ A windshield wiper having includes a wiper
arm, which is driven via a drive shaft and to which a wiper blade is pivotably

B 2
connected, in which at least one spray nozzle (10) is disposed on a pivotable part (14), the spray nozzle being composed of a plurality of parts and its housing (16) communicating disconnectably via a water line (18) to a water pump (118). ~~It is proposed that in~~ In the housing (16) or in a nozzle body (12) communicating with it, a continuous water conduit (20) connected to the water line (18) is provided, from which a connecting conduit (22) branches off that leads to a spray conduit (24) that is approximately parallel to the water conduit (20) and has a nozzle opening (26), the water conduit (20) being closed on its free end (38).
